

APPROVED SMOKELESS BRIQUETTES

Excel is a DEFRA approved fuel, authorised by government for use in smoke control zones across the UK. It is HETAS approved for Open Fires and Closed Appliances. Excel is a low ash, high heat, versatile and robust ovoid. Easy to light, long lasting with a powerful radiant heat, Excel has been a firm favourite with Consumers and Coal Merchants for over 20 years. If you've a multi-fuel stove or an open fire, or indeed you're a canal boat enthusiast, this is your fuel of choice!

Originally designed for use as a stove (closed appliance) fuel, this ovoid has been modified slightly to perform equally as well on an open fire. DEFRA and HETAS approved, this briquettes performance is the reason why it's the UK's fastest growing product in the Manufactured Smokeless Fuels sector. Coal Merchants will enjoy it's robust shape, free of degradation, Consumers will love the low ash, high heat a versatility. Winter days and nights are so much cosier with Newheat!

HIGH QUALITY BRIQUETTES

This is the fuel that Scotland and Northern England try to keep to themselves! High heat, Low ash. Glow by name, glow by nature! Excellent value for money, slumbers readily and responds beautifully as you allow a little air through the fire-bed. If you're in a rural environment, where Winter can be a little harsher than most of us endure, Glow has to be your Briquette of choice!...psst you can get this in the Midlands and South too!

A more recent, but hugely popular, addition to the Oxbow stable. It's performance belies its status as the UK's leading economy fuel. Red is quickly becoming the 'go to' fuel for those consumers now troubled with the quality and availability of traditional Housecoal. The addition of a little bituminous coal to our raw material feedstock enhances the fuels performance. Easy to light, a long flickering flame, low ash, high heat. Coal quality has diminished significantly in the last 3-4 years...Red is your chance to experience, once again, how good a 'real coal fire' can feel! Suitable for open fires and multi-fuel stoves. Great performance and great value for money!
